

Senior Full-Stack Rails Engineer

CarePort Health
Boston, MA

CarePort Health is building technology to improve care transitions while helping patients find the care they need after a hospital stay. Our platform seamlessly connects hospitals, patients, and post-hospital care providers to provide a better experience and outcomes for everyone involved. We're a collaborative team that values humility, trust, and respect, while having a great time learning from one another and building new things every day.

Role Overview

We are looking for a talented and highly motivated mid-to-senior level full-stack engineer to build innovative software applications and services that make patient data flow. As a key member of our team, you will ensure the delivery of high quality software via best practices and help manage the development, staging and release cycles of multiple applications and services. You will be instrumental in building the systems and culture of an exciting company that is fixing a critical problem in the current healthcare system.

Expectations

- You'll work closely with a small team to build exceptional products having a real impact in improving the lives of patients and their caregivers
- You are self-directed and willing to take ownership of your work
- You can rapidly develop well-tested, production quality code
- You contribute meaningfully in code and architecture reviews
- You are a great collaborator and communicator both in written and spoken form

Required Skills & Experience

- 3+ years professional software development experience
- Experience with Ruby on Rails, MySQL
- Knowledge of Java, Go or other high-level language
- Familiarity with HTML/HAML, CSS/SASS, Javascript and jQuery
- Familiarity with a Javascript frameworks such as Ember, Angular or React
- Experience with TDD, RSpec, Capybara, Factory Girl
- Familiar with all phases of agile software development lifecycle

Additional Desired Skills

- Experience with EMR/EHR systems, Mirth Connect, HL7
- Experience with data integrations, ETL, SOAP, REST, SQL
- Experience with version control, Git/Gitflow, Heroku, AWS

Education

- Bachelors Degree or equivalent

Company Benefits

- 100% of health care premiums covered
- Unlimited vacation time
- Convenient location near South Station

About Careport Health

CarePort Health is a Boston-based digital health company focused on building technology solutions that enable acute and post-acute providers to work together to better manage care. CarePort was founded by a team of Harvard physicians with a passion for improving healthcare delivery. Our company is venture-backed by Baseline Ventures, Converge Ventures, Excelerate Health Ventures, Generator Ventures, Launch Capital, Boston Seed Capital, 500 Startups and many individual leaders in the high-tech industry.
